

TARGET STORE 1391

Charleston, SC

368.9 kW Roof-Mounted Solar PV Array

Hannah Solar Government Services (HSGS) was contracted by Greenskies Renewable Energy to design and install a solar photovoltaic (PV) system for a Target store in Charleston, SC. The 368.9 kW roof-mounted system features Phono Solar modules that are supported by an Ecolibrium structure and connected to Solectria inverters. This system is part of a total 3 MW systems HSGS has completed for Target stores across South Carolina.

ABOUT US: Hannah Solar Government Services (HSGS) is a Service-Disabled Veteran Owned Small Business (SDVOSB) leading the way in global energy security by designing and building renewable energy and microgrid systems. HSGS specializes in the design, engineering, construction, and maintenance of solar PV, energy storage, and microgrid systems. Serving government, commercial, industrial clients, HSGS' breadth of experience includes projects that span the continental United States as well as overseas.

Project Specifications:

Customer: Greenskies Renewable Energy

Project Value: \$198.7 K

Project Completion: September 2016

Role: Subcontractor – Designer and Installer

Equipment Specifications:

Modules: Phono Solar

Inverter: Solectria

Structure: Ecolibrium Solar, Inc.

“HSGS delivered an excellent quality final product that was interconnected to both the end-user-client and the electric power distribution system.”

– *Giuseppe Perniciaro, VP of Construction for Greenskies*
