

JULIETTE GORDON LOW BUILDING

Savannah, GA

306-kW Roof-Mounted Solar PV Array

Hannah Solar Government Services (HSGS) was contracted by Ameresco Inc. to design and install a solar photovoltaic (PV) system for Juliette Gordon Low Federal Building in Savannah, GA. The 306-kW roof-mounted system features S-Energy modules that are supported by a PanelClaw structure and connected to ABB TRIO inverters.

This building is named after the founder of the USA Girl Scouts, Juliette Gordon Low. The project was funded under an Energy Savings Performance Contract (ESPC), a contract between a government agency and an energy service company (ESCO). An ESPC allows the government to obtain energy savings and facility improvements with no up-front costs.

Project Specifications:

Customer: Ameresco, Inc.

Project Completion: December 2019

Contract Value: \$254 K

Role: Subcontractor – Designer and Installer

Equipment Specifications:

Modules: S-Energy

Inverter: ABB

Structure: PanelClaw

ABOUT US: Hannah Solar Government Services (HSGS) is a Service-Disabled Veteran Owned Small Business (SDVOSB) leading the way in global energy security by designing and building renewable energy and microgrid systems. HSGS specializes in the design, engineering, construction, and maintenance of solar PV, energy storage, and microgrid systems. Serving government, commercial, industrial clients, HSGS' breadth of experience includes projects that span the continental United States as well as overseas.
